

Upper School laptop recommendations

Given the possibility of remote learning in the coming year and the goal to minimize shared equipment for health and safety reasons, we are asking all families to ensure their student has access to a laptop computer with a camera for video conferencing that they can bring to school each day and reliable internet at home.

Tablets, iPads and phones will not meet this criteria because they cannot always run the applications our faculty may ask students to complete. Chromebooks are also not recommended as there are numerous challenges with zoom connections and difficulties managing both a personal and school google account on these devices.

We recommend a laptop that you are comfortable with your student bringing back and forth to school each day. It should have a built in camera and have an operating system that the student is comfortable navigating. ***It's important that students have a set of personal headphones each day as well.***

Suggestions

Apple laptops will work fine, but often require additional cabling if students want to connect to HDMI inputs digital projectors at school to present content they have created.

The following are low cost ideas for Windows 10 devices. You can use these as minimum specifications.
