Who We Are: We are the 5th grade class at Mount Madonna School. This year we are trying to find as many ways as possible to help protect the blue whales, the ocean and the environment. This Clean-Up Challenge is our way to help prevent trash from getting into the ocean, which ends up killing marine life like whales. Since we cannot host a big group clean up due to COVID, this was our idea to get as many people out there to clean up trash as possible.

Thanks for helping us, help the whales!!!
